

InfiniTek pleased to sponsor the *Mibuso* annual “download” contest

This year **InfiniTek** has volunteered to be a contributing sponsor of the 4th annual “**Best download of 2009**” contest, along with seven other ISV’s (Independent Software Vendors) who offer add-on enhancements to **Microsoft Dynamics NAV** software. Specifically, the award is open to anyone who posts to the “Download” pages of the **Mibuso** web site. It can be a demo-movie used in a sales presentation, a clever routine which helped you in your project, an exhibit of an innovative programming code or anything else posted on the “Download” pages.

This year, as an incentive for participants to vote for their favorite downloads, sponsoring organizations have offered prizes to 20 winners, who will be randomly chosen. **InfiniTek** is offering 1 license for their innovative “paperless office” add-on, **ScanDirect Plus™** configured for five users. This add-on allows a wide range of functions to be consolidated within the NAV program.

Mibuso is a popular website frequented by **Microsoft Dynamics NAV** solution partners which is volunteer run and sponsored and not an official Microsoft-sponsored program.

For more information on the groundbreaking **ScanDirect Plus™** offering please go to InfiniTek’s website at www.infinitek.biz .
